

Copies of the following journal articles or publications are free and can be ordered using the Literature Order Form on the last page. Just write in the appropriate number or letter on the form and return it to us. Note that there are two restrictions:

1. Limit in the Number of Free Articles: In an effort to reduce mailing costs, we are limiting the number of free articles per issue. If you still want additional articles, then you will have to order them on a fee basis from Donna Loucks, the librarian who maintains the FNN database. Just fill in the number of the fee

articles on the bottom half of the order form, return it to us, and we will forward it to Donna.

2. Copyrighted Material. Items with © are copyrighted and require a fee for each copy, so only the title page and abstract will be provided through this service. If you want the entire article, then you can order a copy from a library service or from Donna.

Bareroot Production

1. **Determining optimal lifting time of nursery stock for cold storage.** Bronnum, P. International Plant Propagators' Society, combined proceedings 1998, 48:289-293. 1999.
2. **Freeze and frost protection with aqueous foam -field experiments.** Choi, C. Y.; Giacomelli, G. HortTechnology 9(4):662-667. 1999.
3. **Freeze and frost protection with aqueous foam -foam development.** Choi, C. Y.; Zimmt, W.; Giacomelli G. HortTechnology 9(4):654-661. 1999.

Container Production

4. **An assessment of ponderosa pine seedlings grown in copper-coated polybags.** Dumroese, R. K.; Wenny, D. L. Tree Planters' Notes 48(3/4):60-64. 1997.
5. **Control of growing medium water content and its effect on small seedlings grown in large containers.** Lambany, G.; Renaud, M.; Beauchesne, M. Tree Planters' Notes 48(3/4):48-54. 1997.
6. **Effect of container type on growth of Douglas-fir, lodgepole pine and hybrid spruce seedlings.** Flanagan, A.; Jones, M. IN: Forest Nursery Association of British Columbia, proceedings, 19th annual meeting, p. 52-57. 1999.

7. **Ethylene pollution can kill your plants.** Gibson, J. L.; Whipker, B. E.; Blankenship, S.; Boyette, M.; Creswell, T.; Miles, J.; Peet, M. Greenhouse Management and Production 19(11):55, 57-63. 1999.
8. **Fiber pots for the ornamental plant industry.** Beattie, D. J.; Berghage, R. International Plant Propagators' Society, combined proceedings 1998, 48:284-288. 1999.
9. **Growth regulation and cold hardening of silver birch seedlings with short-day treatment.** Luoranen, J. Rikala, R. Tree Planters' Notes 48(3/4):65-71. 1997.
10. **Heat tolerance of selected provenances of Atlantic white cedar.** Jull, L. G.; Ranney, T. G.; BLazich, F. A. Journal of the American Society of Horticultural Science 124(5):492-497. 1999.
11. **Multiple uses of Spin Out in the nursery and landscape.** Crawford, M. A. International Plant Propagators' Society, combined proceedings 1998, 48:627-631. 1999. Spin Out is the first EPA registered product for controlling plant root growth in containers. The active ingredient is copper hydroxide.
12. **Optimum seed use.** Kitchen, J. IN: Forest Nursery Association of British Columbia, proceedings, 19th annual meeting, p. 32-33. 1999.
13. **Plant height control by photo selective filters: current status and future prospects.** Rajapakse, N. C.; Young, R. E.; McMahon, M. J.; Oi, R. HortTechnology 9(4):618-624. 1999.

14. **Polypit: an improved technique for raising nursery plants.** Vyas, P.; Bisht, M. S.; Bhuchar, S.; Sharma, S.; Palni, L. M. S. *Journal of Sustainable Forestry* 8(1):43-59. 1999. A polypit, a "poor man's growth chamber protected seedlings in the Himalayan region.
15. **Pot-in-pot container culture.** Mathers, H. *The Digger* 43(11): 42, 43, 45. 1999. In PIP production a planted container is placed in a holder pot that has been permanently placed in the ground.
16. **Seed use panel.** Morton, B. IN: Forest Nursery Association of British Columbia, proceedings, 19th annual meeting, p. 28-29. 1999. Can the sowing factor be reduced without economic loss when sowing with a Vancouver Biomachines seeder
17. **Seed use - the bottom line (or, how much seed are you using to produce a seedling?).** Thorpe, S. IN: Forest Nursery Association of British Columbia, proceedings, 19th annual meeting, p. 30-31. 1999.
18. **Seedling growth of Atlantic white-cedar as influenced by photoperiod and day/night temperature.** Jull, L. G.; Blazich, F. A.; Hinesley, L. E. *Journal of Environmental Horticulture* 17(3):107-1113. 1999.
19. **Seedling propagation in bottomless bands.** McCorkle, R. International Plant Propagators' Society, combined proceedings 1998, 48:571-577. 1999. Describes use of Anderson bottomless bands by S&S Nurseries.
20. **Use of cold water for irrigation reduces stem elongation of plug-grown tomato and cabbage seedlings.** Chen, J. J.; Sun, Y. W.; Sheen, T. F. *HortScience* 34(5):852-854. 1999.
24. **Commercial propagation of Trillium.** Solt, S. International Plant Propagators' Society, combined proceedings 1998, 48:329-333. 1999.
25. **Common difficulties encountered in collecting native seed.** Dunne, R. IN: Revegetation with native species: proceedings, 1997, p. 28-29. Society of Ecological Restoration annual meeting. USDA Forest Service, Rocky Mountain Research Station, Proceedings RMRS-P-8.1999.
26. **Dormancy-breaking and germination requirements in seeds of the summer annual *Palafoxia callosa* (Asteraceae) from central Texas.** Baskin, C. C.; Baskin, J. M.; Van Auken, O. W. *Southwestern Naturalist* 44(3):272-277. 1999.
27. **Ecological genetics and the restoration of plant communities: mix or match?** Lesica, P.; Allendorf, F. W. *Restoration Ecology* 7(1): 42-50.1999.
28. **The effect of cold stratification and light on the seed germination of temperate sedges (*Carex*) from various habitats and implications for regenerative strategies.** Schutz, W.; Rave, G. *Plant Ecology* 144:215230. 1999.
29. **The effect of light and number of diurnal temperature fluctuations on germination of *Phragmites australis*.** Ekstam, B.; Johannesson, R.; Milberg, P. *Seed Science Research* 9:165-170. 1999.
30. **Effects of moisture, temperature, and time on seed germination of five wetland *Carices*: implications for restoration.** Budelsky, R. A.; Galatowitsch, S. M. *Restoration Ecology* 7(1):86-97. 1999.

Diverse Species

21. **Asexual plant propagation: special techniques and considerations for successful high altitude revegetation.** Scianna, J. D.; Winslow, S. R.; Majerus, M. E.; Gruber, L. M.; Reid, S. A. IN: High altitude revegetation workshop no. 13, proceedings, p. 105-117. W.R. Keammerer and E.F. Redente, eds. Colorado State University, Colorado Water Resources Research Institute, Information Series 89. 1998.
22. **Asexual propagation of *Anemonella*, *Dodecatheon*, and *Trillium*.** Blanchette, L. International Plant Propagators' Society, combined proceedings 1998, 48:327-329. 1999.
23. **Collection and production of indigenous plant material for National Park restoration.** Majerus, M. IN: Revegetation with native species: proceedings, 1997, p. 17-21. Society of Ecological Restoration annual meeting. USDA Forest Service, Rocky Mountain Research Station, Proceedings RMRS-P-8.1999.
31. **Forests planted for ecosystem restoration or conservation.** Harrington, C. A. *New Forests* 17(1-3):175-190. 1999.
32. **The galloping forester's guide to sexual propagation, or so many seeds, so little time.** Spaulding, S. J. IN: High altitude revegetation workshop no. 13, proceedings, p. 198-206. W.R. Keammerer and E.F. Redente, eds. Colorado State University, Colorado Water Resources Research Institute, Information Series 89.1998.
33. **Growing mycorrhizal native plant species.** Lu, S. International Plant Propagators' Society, combined proceedings 1998, 48:665-668. 1999.
34. **A growing reputation.** Cullina, B. *American Nurseryman* 190(6): 32-34, 36, 38-41. 1999. Man woodland wildflower species have a reputation for being difficult to propagate by seed, but successful growing can be achieved by using the right propagation method.

35. **Imbibition temperature affects on seedling vigor: in crops and shrubs.** Booth, D. T.; Bai, Y. *Journal of Range Management* 52(5): 534-538. 1999.
36. ©**The importance of transplant size and gap width in the botanical enrichment of species-poor grasslands in Britain.** Davies, A.; Dunnett, N. P.; Kendle, T. *Restoration Ecology* 7(3): 271-280. 1999.
37. **Important biological factors for utilizing native plant species.** Weisner, L. E. IN: *Revegetation with native species: proceedings, 1997*, p. 39-43. Society of Ecological Restoration annual meeting. USDA Forest Service, Rocky Mountain Research Station, Proceedings RMRS-P-8. 1999.
38. ©**Low- and high-temperature storage effects on viability and germinability of seeds of three Australian Asteraceae.** Peishi, Z.; Plummer, J. A.; Turner, D. W.; Choengasaaat, D.; Bell, D. T. *Australian Journal of Botany* 47:265-275. 1999.
39. ©**Micropropagation systems for the Mexican redbud *Cercis canadensis* var. *Mexicana* L.) and other woody plants of the Chihuahuan desert.** Mackay, W. A. *In Vitro Cellular and Developmental Biology - Plant* 35(3):283-284. 1999.
40. **Native plant restoration on the Going-to-the-Sun Road, Glacier National Park.** Lange, D. E.; Lapp, J. IN: *Revegetation with native species: proceedings, 1997*, p. 22-27. Society of Ecological Restoration annual meeting. USDA Forest Service, Rocky Mountain Research Station, Proceedings RMRS-P-8. 1999.
41. **Propagating in the desert southwest: what we do and why we do it.** Davison, E. *International Plant Propagators' Society, combined proceedings 1998*, 48:675-677. 1999.
42. **Propagating native cool season grasses for conservation use.** Kujawski, J. L. *International Plant Propagators' Society, combined proceedings 1998*, 48:471-472. 1999.
43. **Propagating palms from seeds.** Hodel, D. R. *International Plant Propagators' Society, combined proceedings 1998*, 48:690-695. 1999.
44. **Propagation of four American carnivorous plant genera: *Pinguicula*, *Drosera*, *Dionaea*, and *Sarracenia*.** Booman, J. L. *International Plant Propagators' Society, combined proceedings 1998*, 48:689-690. 1999.
45. **Propagation of indigenous and endemic ornamental Hawaiian plants.** Criley, R. A. *International Plant Propagators' Society, combined proceedings 1998*, 48:669-674. 1999.
46. **Propagation of *Phlox paniculata* from root cuttings.** Leiss, J. *International Plant Propagators' Society, combined proceedings 1998*, 48:326-327. 1999.
47. ©**Seed dormancy and germination in *Rehxia mariana* var. *interior* (Melastomataceae) and eco-evolutionary implications.** Baskin, C. C.; Baskin, J. M.; Chester, E. W. *Canadian Journal of Botany* 77(4): 488-493. 1999.
48. **Selecting plant species for ecological restoration: a perspective for land managers.** Brown, R. W.; Amacher, M. C. IN: *Revegetation with native species: proceedings, 1997*, p. 1-16. Society of Ecological Restoration annual meeting. USDA Forest Service, Rocky Mountain Research Station, Proceedings RMRS-P-8. 1999.
49. ©**Sexual reproduction and early plant growth of the Wollemi pine (*Wollemia nobilis*), a rare and threatened Australian conifer.** Offord, C. A.; Porter, C. L.; Meagher, P. F.; Errington, G. *Annals of Botany* 84:1-9. 1999.
50. ©**Smoke affects the germination of native grasses of New South Wales.** Read, T. R.; Bellairs, S. M. *Australian Journal of Botany* 47:563-576. 1999.
51. ©**Woolgrass: a plant profile.** Larson, J. L. *Ecological Restoration* 17(4):210-215. 1999.

Fertilization and Nutrition

52. **Common toxicities: preventing damage to woody ornamentals.** Mathers, H. *Nursery Management and Production* 15(6): 39-41, 43-44. 1999.
53. **The effects of nitrogen, phosphorus and mycorrhizal infection on root and shoot growth of two contrasting genotypes of *Betula pendula* Roth.** Mackie-Dawson, L. A.; Lavender, E. A.; Atkinson, D. IN: *Root demographics and their efficiencies in sustainable agriculture, grasslands and forest ecosystems*, p. 165-175. J.E. Box, Jr., ed. Kluwer Academic Publishers. 1998.
54. **Evaluating nursery plant performance in biosolids amended soils.** Johnson, J. R. *International Plant Propagators' Society, combined proceedings 1998*, 48:467-470. 1999.
55. ©**Fertilizer use efficiency by containerized nursery plants 3. Effect of heavy leaching and damaged fertilizer prills on plant growth, nutrient uptake, and nutrient loss.** Huett, D. O.; Morris, S. C. *Australian Journal of Agricultural Research* 50:217-222. 1999.
56. **N-fertilization of nursery crops in the field - a review, part III.** Alt, D. *Gartenbauwissenschaft* 63(6):278-282. 1998.

57. ©**Nitrogen competition using 15N between early successional plants and planted white spruce seedlings.** Staples, T. E.; Van Rees, K. C. J.; van Kellsl, C. *Canadian Journal of Forest Research* 29(8):1282-1289. 1999.
58. **Nitrogen leaching from container-grown plants.** Hansen, C. W.; Petersen, K. K. *International Plant Propagators' Society, combined proceedings* 1998, 48:280-283. 1999.
59. **Nutrient use patterns in woody perennials: implications for increasing fertilizer efficiency in field-grown and landscape ornamentals.** Rose, M. A. *HortTechnology* 9(4):613-617. 1999.
60. **Preplant lime and micronutrient amendments to pine bark affect growth of seedlings of nine container-grown tree species.** Wright, A. N.; Niemiera, A. X.; Harris, J. R.; Wright, R. D. *HortScience* 34(4):669-673. 1999.
61. **Using nutrient uptake patterns to develop efficient nitrogen management strategies for vegetables.** Sanchez, C. A.; Doerge, T. A. *HortTechnology* 9(4):601-606. 1999.

General and Miscellaneous

62. **Are nonsignificant differences really not significant?** Marini, R. P. *HortScience* 34(5):761-762. 1999.
63. **Experiences with recycling in Germany.** Terhechte, U. *International Plant Propagators' Society, combined proceedings* 1998, 48:212-214. 1999.
64. **The financial and economic profit-ability of field afforestation in Finland.** Niskanen, A. *Silva Fennica* 33(2):145-157. 1999.
65. **How to conduct your own product testing.** Powell, C. C. *Nursery Management and Production* 15(11):51, 55. 1999.
66. **Past, present and future artificial regeneration in Atlantic Canada.** Lanteigne, L. IN: *Forest Nursery Association of British Columbia, proceedings, 19th annual meeting*, p. 59-60. 1999.
67. **Site-specific farming: a perspective on information needs, benefits and limitations.** Atherton, B. C.; Morgan, M. T.; Shearer, S. A.; Stombaugh, T. S.; Ward, A. D. *Journal of Soil and Water Conservation* 54(2):455-461. 1999.
68. **Wetland destinations.** Davis, T. *Nursery Management and Production* 15(9):28-32. 1999.

Pierson Nurseries in Biddeford, Main, grows wetland plants on 6 acres of swales and ponds.

Forest Nursery Association of British Columbia, Proceedings, 19th annual meeting. Held Sept. 27-30, 1999, Vancouver, B.C. 1999. ORDER FROM: A limited number of copies are available from Nursery Extension Services, Ministry of Forests, V3V 7Z2, CANADA. TEL: 604.582.6910; FAX: 604.775.1288; E-mail: Dave.Trotter@gems4.gov.bc.ca

Genetics and Tree Improvement

69. ©**Effects of reforestation methods on genetic diversity of lodgepole pine: an assessment using microsatellite and randomly amplified polymorphic DNA markers.** Thomas, B. R.; Macdonald, S. E.; Hicks, M.; Adams, D. L.; Hodgetts, R. B. *Theoretical and Applied Genetics* 98:793-801. 1999.
70. ©**Forest-tree biotechnology: genetic transformation and its application to future forests.** Tzfira, T.; Zuker, A.; Altman, A. *Trends in Biotechnology* 16:439-446. 1999. Discusses targets for forest tree engineering: modifying lignin content and composition, altering tree form, quality and performance, herbicide resistance, insect resistance, and improving abiotic stress tolerance.
71. ©**Spring and fall cold hardiness in wild and selected seed sources of coastal Douglas-fir.** Stevenson, J. F.; Hawkins, B. J.; Woods, J. H. *Silvae Genetica* 48(1):29-34. 1999.

Mycorrhizae and Beneficial Microorganisms

72. **The benefits of *Trichoderma* and mycorrhizas in growing media.** Brooke, M. S. I. *International Plant Propagators' Society, combined proceedings* 1998, 48:151-153. 1999.
73. **Commercial mycorrhizal inoculants: value-added conifers for site rehabilitation or just another way to spend money?** Berch, S.; Xiao, G.; Bulmer, C. IN: *Forest Nursery Association of British Columbia, proceedings, 19th annual meeting*, p. 34-38. 1999.
74. ©**Ectomycorrhizal fungi associated with *Arctostaphylos* contribute to *Pseudotsuga menziesii* establishment.** Horton, T. R.; Bruns, T. D.; Parker, V. T. *Canadian Journal of Botany* 77(1):93-102. 1999.
75. **Establishment of vegetation on mined sites by management of mycorrhizae.** Marx, D.; Marrs, L. F.; Cordell, E. *Land and Water* 42(5):13-16. 1998.

76. **Screening commercial peat and peat-based products for the presence of *Ericoid* mycorrhizae.** Gorman, N. R.; Heleba, D. A.; Starrett, M. C. International Plant Propagators' Society, combined proceedings 1998, 48: 458-459. 1999.
77. **©Short-term phosphorus uptake rates in mycorrhizal and non mycorrhizal roots of intact *Pinus sylvestris* seedlings.** Colpaert, J. V.; Van Tichelen, K. K.; Van Assche, J. A.; Van Laere, A. New Phytologist 143(3): 589-597. 1999.
78. **©Spruce growth response specificity after treatment with plant growth-promoting *Pseudomonads*.** Shishido, M.; Chanway, C. P. Canadian Journal of Botany 77(1):22-31. 1999.
79. **Use of beneficial microorganisms for improvement in sustainable monoculture of plants.** Hunt, J. S.; Gale, D.S.J. International Plant Propagators' Society, combined proceedings 1998, 48:75-79. 1999.
80. **Maintaining bare-root coolers.** Davis, T. Nursery Management and Production 15(12): 45-48. 1999.
81. **New trends in natural ventilation.** Baze, G. International Plant Propagators' Society, combined proceedings 1998, 48: 699-702. 1999.
82. **NGMA: good choices are available in shading.** Morgan, D. Nursery Management and Production 15(8): 63-64. 1999.
83. **Nursery solves efficiency issues.** Horning, G. Farwest Magazine 43(8): 112-113. 1999. A grinder is used to recycle cull trees; a forklift with 4 forks hauls container or B&B stock.
84. **On the right track.** Gainer, B. L. American Nurseryman 190(1): 26-28, 30. 1999. A line of unique, multi-purpose tractors has been helping nursery professionals streamline their tasks.
85. **Self-steering systems for tractors and other cultivation machinery.** Kohler, L. International Plant Propagators' Society, combined proceedings 1998, 48:231-237. 1999. Reviews use of ultrasound, infrared light, and laser light in automatic steering systems, with potential uses for weed cultivation and planting.

Nursery Structures and Equipment

80. **A breath of fresh air.** Baze, G. American Nurseryman 190(7): 48-50, 52, 54.1999.
81. **Building from scratch.** Horning, G. The Digger 43(6): 44-45. 1999. The KCK Farms in Dayton, OR developed a greenhouse watering boom and a self-made potting machine.
82. **Clicking with digital cameras.** Thomas, P. A. Greenhouse Grower 17(12):50, 52-54. 1999. Digital cameras are fast becoming an essential tool for greenhouse managers.
83. **Flow diagrams help growers' mechanization decisions.** Bartok, J. W., Jr. Greenhouse Management and Production 19(11):72-73. 1999.
84. **Get the most control from your greenhouse thermostats.** Bartok, J. W., Jr. Greenhouse Management and Production 19(8):68-69. 1999.
85. **Heat-retentive films for increasing soil temperatures during solarization in a humid, cloudy environment.** Chase, C. A.; Sinclair, T. R.; Chellemi, D. O.; Olson, S. M.; Gilreath, J. P.; Locascio, S. J. HortScience 34(6):1085-1089. 1999.
86. **Identify jobs to mechanize.** Bartok, J. W., Jr. Greenhouse Management and Production 19(9):79-80. 1999.
87. **IR film offers payback.** Bartok, J. W., Jr. Greenhouse Management and Production 19(10):65-66. 1999.
88. **Understanding geographic information systems and global positioning systems in horticultural applications.** Heiniger, R. W. HortTechnology 9(4):539547. 1999.

Outplanting Performance

95. **Early field effects of tree improvement and nursery culture on height growth of western hemlock.** Cartwright, C. C. IN: Forest Nursery Association of British Columbia, proceedings, 19th annual meeting, p. 84-86. 1999.
96. **The effect of desiccation and rough-handling on the survival and early growth of ash, beech, birch and oak seedlings.** McKay, H. M.; Jinks, R. L.; McEvoy, C. Annals of Forest Science 56:391-402. 1999.
97. **The effect of pre-planting desiccation stress and root pruning on the physiological condition and subsequent field performance of one year old *Prunus avium* and *P. cerasifera* seedlings.** Symeonidou, M. V.; Buckley, G. P. Journal of Horticultural Science and Biotechnology 74(3):386-394. 1999.
98. **©Effect of reforestation methods on pine weevil (*Hylobius abietis*) damage and seedling survival.** Orlander, G.; Nilsson, U. Scandinavian Journal of Forest Research 14(4):341-354. 1999.

99. ©Effects of planting on concentrations of terpenes, resin acids and total phenolics in *Pinus sylvestris* seedlings. Sallas, L.; Vuorinen, M.; Kainulainen, P.; Holopainen, J. K. Scandinavian Journal of Forest Research 14(3):218-226. 1999.
100. ©Effects of root wrenching on the growth and water relations of *Prunus avium* and *Castanea sativa* seedlings in nursery beds and after outplanting. Hipps, N. A.; Higgs, K. H.; Collard, L. G. Canadian Journal of Forest Research 29(6):696-704. 1999.
101. The efficacy of stem guards in protecting *Pinus patula* seedlings in KwaZulu-Natal Midlands, South Africa. Taylor, S.; Perrin, M. R. Southern African Forestry Journal 185:35-37. 1999.
102. Greenhouse and field growth of northern red oak seedlings inside different types of treeshelters. Sharpe, W. E.; Swistock, B. R.; Mecum, K. A.; Demchik, M. C. Journal of Arboriculture 25(5):249-257. 1999.
103. ©Growth of planted tree seedlings in response to ambient light levels in northwestern interior cedar-hemlock forests of British Columbia. Coates, K. D.; Burton, P. J. Canadian Journal of Forest Research 29(9):1374-1382. 1999.
104. Growth of root-pruned seedlings in a thermally impacted area of South Carolina. Brantley, E. F.; Conner, W. H. Tree Planters' Notes 48(3/4):76-80. 1997.
105. Improved tree-planting tools. Trent, A. USDA Forest Service, Technology and Development Program Timber Tech Tips 9924-2316-MTDC. 6 p. 1999. Field tests were performed on 4 tools: A hollow dibble, a slide hammer with soil extractor, the Tanaka gas-powered hand drill with auger, and a battery-powered hand drill with auger.
106. Interior spruce stock type trial - twenty year results. McClamon, J. IN: Forest Nursery Association of British Columbia, proceedings, 19th annual meeting, p. 72-76. 1999.
107. Microsite selection - trial results from northern British Columbia. Bedford, L.; McClarnon, J. IN: Forest Nursery Association of British Columbia, proceedings, 19th annual meeting, p. 65-71. 1999.
108. The morphological characteristics, root growth potential and flushing response of rooted cuttings compared with transplants of Sitka spruce. O'Reilly, C.; Harper, C. Annals of Forest Science 56(3):201-210. 1999.
109. ©Nursery stock and field fertilizer application affect early performance of *Pinus radiata* on a phosphorus-deficient site in Northland. South, D. B.; Skinner, M. F. New Zealand Journal of Forestry Science 28(3):361-372. 1998.
110. ©Performance of birch seedlings replanted in heavily polluted industrial barrens of the Kola Peninsula, northwest Russia. Kozlov, M. V.; Haukioja, E. Restoration Ecology 7(2):145-154. 1999.
111. The physiological status of Douglas fir seedlings and the field performance of freshly lifted and cold stored stock. O'Reilly, C.; McCarthy, N.; Keane, M.; Harper, C. P.; Gardiner, J. J. Annals of Forest Science 56:297-306. 1999.
112. Planting frozen conifer seedlings. Kooistra, C. M.; Bakker, J. D. IN: Forest Nursery Association of British Columbia, proceedings, 19th annual meeting, p. 87-89. 1999.
113. ©Regenerating white spruce, paper birch, and willow in south-central Alaska. Cole, E. C.; Newton, M.; Youngblood, A. Canadian Journal of Forest Research 29(7):993-1001. 1999.
114. ©Stem sinuosity, tree size, and pest injury of machine-planted loblolly pine with bent versus straight taproots. Harrington, T. B.; Gatch, J. A.; Price, T. S. Southern Journal of Applied Forestry 23(4):197-202. 1999.
115. Stock type selection and forest practices. Forsythe, P. IN: Forest Nursery Association of British Columbia, proceedings, 19th annual meeting, p. 61-64. 1999.
116. ©Treeshelters: a judicious choice for improving red ash growth. Delisle, C. Forestry Chronicle 75(5):845-849. 1999.
