Forest Nurserymen Conferences

FOREWORD

The Southeastern Area, State and Private Forestry, U. S. Forest Service, and the Southern Group of State Foresters were happy to sponsor the 1966 Nurserymen's Conferences.

The meetings demonstrated the changing nature of the job of forest tree nurserymen. No longer do they only *grow* pine seedlings. For many nurserymen, present "new" jobs include the production of hardwoods **and** seed orchard management. All papers relating to these subjects and other papers presented at the Conferences are contained in these proceedings.

The Southern Group of State Foresters and the Southeastern Area, State and Private Forestry, wish to express their thanks to the host states, South Carolina and Arkansas, and to all personnel who helped with the two Conferences.

C. H. COULTER, Chairman
Southern Group of State Foresters

D. A. CRAIG, Director
