

CONTENTS

Getting Started

1. Why Start a Tropical Nursery for Native and Traditional Plants?	17
<i>Kim M. Wilkinson and Brian F. Daley</i>	
The Environmental and Social Context in the U.S. Affiliated Tropical Islands	19
Why Grow Native Plants?.....	20
Why Grow Traditional Plants?	22
The Role of Nurseries in Ecosystem Restoration and Cultural Renewal	25
Challenge and Opportunity	28
References.....	28
2. Planning a Tropical Nursery	31
<i>Kim M. Wilkinson and Thomas D. Landis</i>	
The Importance of Planning	32
Defining the Nursery’s Vision and Objectives.....	33
Determining Community Needs	33
Defining Target Plant Needs and Other Services	35
Assessing Resources and Costs	36
Selecting a Nursery Site.....	38
Planning the Flow of Work.....	42
Planning as an Ongoing Process	42
References.....	43
3. Defining the Target Plant	45
<i>Thomas D. Landis and Kim M. Wilkinson</i>	
Important Approaches for Implementing the Target Plant Concept.....	46
1. What Are the Outplanting Objectives?.....	48
2. What Are the Conditions of the Outplanting Site?.....	51
3. What Factors on the Project Site Could Limit Success?.....	52
4. How Will Limiting Factors Be Mitigated?	53
5. What Species and Genetic Sources Will Meet Project Objectives?.....	55
6. What Types of Plant Materials (Stocktypes) Are Best Suited to the Project Site and Objectives?.....	58
7. What Are the Best Outplanting Tools and Techniques?	63
8. What Is the Best Time for Outplanting?.....	63
Learning and Adapting: Field Testing the Target Plant	64
References.....	64
Additional Reading	65
4. Crop Planning: Propagation Protocols, Schedules, and Records	67
<i>Kim M. Wilkinson and Douglass F. Jacobs</i>	
Developing Propagation Protocols	69
Developing Growing Schedules	72
Propagule Collection, Processing, and Treatment	72
Crop Growth Phases	73

CONTENTS (continued)

Developing Facilities Schedules	75
Keeping Written Records Makes Planning Easier	78
References	82
Additional Reading	83
Appendixes	84

Developing Your Nursery

5. Propagation Environments	89
<i>Douglass F. Jacobs, Thomas D. Landis, Tara Luna, and Diane L. Haase</i>	
Matching Propagation Environments to the Site	90
The Challenge of Growing Many Species and Stocktypes	90
Minimally Controlled Propagation Environments	91
Semicontrolled Propagation Environments	92
Fully Controlled Propagation Environments	93
Specialized Rooting Propagation Environments	95
Modifying Light and Temperature in Propagation Environments	97
Equipment Maintenance	99
References	99
Additional Reading	99
6. Growing Media	101
<i>Thomas D. Landis, Douglass F. Jacobs, Kim M. Wilkinson, and Tara Luna</i>	
Functions of Growing Media	102
Physical Properties of Growing Media	103
Chemical Properties of Growing Media	103
Biological Properties of Growing Media	105
Growing Media Ingredients	105
Developing a Growing Medium	112
Treatment of Growing Media Ingredients	115
Mixing Growing Media	117
Safety Considerations	118
Testing Growing Media	118
References	120
Additional Reading	121
7. Containers	123
<i>Thomas D. Landis, Tara Luna, and R. Kasten Dumroese</i>	
Container Characteristics Affecting Plant Development	124
Economic and Operational Factors Affecting Container Choice	128
Types of Containers	129

CONTENTS (continued)

Cleaning Reusable Containers	137
References	138
Additional Reading	139
Plant Propagation	
8. Collecting, Processing, and Storing Seeds	141
<i>Tara Luna and Kim M. Wilkinson</i>	
Understanding Genetic Diversity and Seed Collection Ethics	142
Understanding Flowers and Seeds	144
Collecting Seeds	148
Processing Seeds	152
Seed Testing	156
Storing Seeds	158
References	160
Additional Reading	161
9. Seed Germination and Sowing Options	163
<i>Tara Luna, Kim M. Wilkinson, and R. Kasten Dumroese</i>	
Seed Characteristics	164
Treatments To Overcome Seed Dormancy and Enhance Germination	165
Environmental Factors Influencing Germination	171
Seed Sowing Methods	172
Seed Coverings (Mulch)	178
Try Different Sowing Techniques and Keep Detailed Records	181
Larger Role of Nurseries in Conservation of Species	182
References	182
Additional Reading	183
10. Vegetative Propagation	185
<i>Tara Luna and Diane L. Haase</i>	
Comparing Vegetative to Seed Propagation	186
Cuttings	186
Selecting Cuttings From Mother Plants	189
Collecting, Transporting, and Storing Cuttings	191
Types of Rooting	191
Cutting Preparation	192
Striking, Monitoring, and Growing Cuttings	194
Other Methods of Vegetative Propagation	197
References	205

CONTENTS (continued)

Plant Care

11. Water Quality and Irrigation	207
<i>Thomas D. Landis and Kim M. Wilkinson</i>	
Sources of Irrigation Water	208
Water Quality	209
Water Treatments	212
Water Quantity	213
Factors Affecting Water Availability to Plants	214
Determining How Much to Irrigate	214
Fertigation	217
Determining When To Irrigate	217
Types of Irrigation Systems	220
Water Conservation and Managing Nursery Wastewater	229
References	230
12. Plant Nutrition and Fertilization	233
<i>Douglass F. Jacobs and Thomas D. Landis</i>	
Basic Principles of Plant Nutrition	234
Sources of Mineral Nutrients	236
Organic Fertilizers	238
Synthetic Fertilizers	240
Comparison of Organic Versus Synthetic Fertilizers	243
Fertilizer Application Rates and Methods	244
Determining When to Fertilize	246
Monitoring and Testing	248
Reducing the Environmental Effects of Fertilization	250
References	250
Additional Reading	250
13. Beneficial Microorganisms	253
<i>Kim M. Wilkinson and David P. Janos</i>	
The Importance of Beneficial Microorganisms in the Nursery	255
Nitrogen-Fixing Bacteria	256
Mycorrhizal Fungi	262
Other Beneficial Microorganisms	270
Acknowledgements	270
References	270
Additional Reading	271

CONTENTS (continued)

14. Problem Prevention and Holistic Pest Management	273
<i>Thomas D. Landis, Tara Luna, R. Kasten Dumroese, and Kim M. Wilkinson</i>	
Nursery Diseases and Pests	275
Problem Prevention Through Cultural Measures	276
Problem Detection and Diagnosis	279
Problem Management	282
Ongoing Process Evaluation	289
Acknowledgment	290
References	290
Additional Reading	291

Hardening, Shipping, and Outplanting

15. Hardening	293
<i>Douglass F. Jacobs, Thomas D. Landis, and Kim M. Wilkinson</i>	
The Importance of Hardening	294
Objectives of the Hardening Phase	295
Conditioning Plants for Outplanting	296
References	301
16. Harvesting and Shipping	303
<i>Diane L. Haase, Thomas D. Landis, and Tara Luna</i>	
Scheduling the Harvesting Window	304
Grading Plants for Outplanting	304
Short-Term Storage	305
Packing	306
Shipping	306
Handling	308
References	311
17. Outplanting	313
<i>Diane L. Haase, Thomas D. Landis, and R. Kasten Dumroese</i>	
Review of the Target Plant Concept and Implications for Outplanting	314
Site Preparation	316
Onsite Inspection, Storage, and Handling	319
Selecting Planting Spots	320
Proper Planting Technique	322
Treatments at the Time of Planting	328
Monitoring Planting Quality	331
Monitoring Outplanting Performance	331
Post-Planting Maintenance	333
Long-Term Follow-up: Refining Target Plant Specifications	334
References	335

CONTENTS (continued)

Relationships, Management, and Learning

18. Working With People	339
<i>Kim M. Wilkinson</i>	
Interact Based on the Nursery Vision and Objectives	340
Working With Yourself	340
Working With Nursery Staff	341
Working With Clients	342
Working With the Community	348
References	349
19. Nursery Management	351
<i>Thomas D. Landis and Kim M. Wilkinson</i>	
Identifying Nursery Tasks	352
Planning and Scheduling	352
Daily Tasks and Observations	354
Recordkeeping	355
Crop Planning and Production Tasks	356
Seasonal Cleanup and Maintenance	357
Financial Management	357
Problem Solving	358
References	359
20. Discovering Ways to Improve Nursery Practices and Plant Quality	361
<i>Kim M. Wilkinson and Diane L. Haase</i>	
The Importance of Trying New Things in the Nursery	362
Making Observations and Keeping Records	363
Step 1: Developing Ideas for Nursery Experiments	364
Step 2: Gathering Information	365
Step 3: Specifying a Question and Creating the Hypothesis	365
Step 4: Designing the Experiment	365
Step 5: Conducting the Experiment	368
Step 6: Making Observations and Collecting Data	368
Step 7: Assessing, Recording, and Sharing Results	371
Requesting Assistance When Needed	371
Field Testing to Refine the Target Plant	373
Beyond Experiments: Learning Through Reflective Practice	374
References	376
Additional Reading	376
